Fremont, CA, 94536

PERSONAL STATEMENT

Aspiring computer scientist with a particular interest in AI governance and algorithmic fairness. Eight years of coding experience and a strong competency in Python, Java, and C++ backed by extensive competitive programming. Currently lead and collaborate on projects that apply AI to equitable juvenile justice interventions, leveraging success as a project manager and independent researcher. Finely honed communication and analytical skills through forensics and student advocacy. Leader. Mentor. Dreamer.

EDUCATION

Washington High School, 4.0 GPA

2023 - Present

Advanced Coursework: AP Physics C, Multi-Variable Calculus, Linear Algebra, AP Computer Science A, AP Spanish Language, AP United States History, Honors English
Test Scores: 1540 SAT (780 M, 760 R&W), AP Calculus BC (5), AP Chemistry (5), AP World History (5)

SKILLS & CERTIFICATIONS

Technical: Python, C++, Java, Data Analysis, Explainable AI, PyTorch, TensorFlow

Leadership & Communication: Project Management, Public Speaking, Mentorship

Certifications

- | | |
|---|------------|
| • C++ for Programmers (Codecademy) | June 2025 |
| • Introduction to Machine Learning Certification (Kaggle) | July 2024 |
| • Machine Learning Explainability Certification (Kaggle) | July 2024 |
| • Scouts of America National Youth Leadership Training Certification | June 2024 |
| • MIT BeaverWorks Summer Institute: Python Core Certification | March 2024 |

COMPUTER SCIENCE EXPERIENCE

Non-Trivial Research Fellow

March 2026 - Present

- Selected as a Summer Research Fellow (<2.5% acceptance rate)
- Used impact, tractability, and neglectedness analysis to develop a research proposal on youth incarceration and alternatives to punitive discipline
- Engaged with fellows and mentors to stress-test assumptions, refine reasoning, and communicate research ideas with greater transparency
- Developing summer fellowship project applying causal inference to understand how educational interventions may reduce juvenile justice contact among at-risk youth

Independent Research

May 2024 - Present

- Authored [published paper](#) using adversarial learning and SHAP explainability to study racial bias in recidivism risk assessment models
- Built and evaluated classifier that reduced racial disparities across demographic parity, false positive rate, and false negative rate metrics

Whiteboard, Los Altos Hacks '25

October 2024

- Developed an AI-powered student dashboard to assist teachers in grading and providing personalized feedback, reducing workload and enhancing student support
- Integrated AWS Servers for scalable storage and processing; implemented a custom program to digitize handwritten submissions
- Leveraged software for LLM-based feedback generation, enabling individualized education plans and class-wide analysis

Clarify, Congressional App Challenge '24

October 2024

- Developed app to combat local crime with the use of Machine Learning to remove blur from heavily pixelated security footage
 - Aimed to improve accessibility to such tools, allowing any person with a smartphone to stay protected from package theft & robberies
- Worked alongside a team of 3+ other people, assisted with researching model structure and optimizing performance, along with designing an intuitive iOS front-end application

Aspiring Scholars Directed Research Program, AI/ML Researcher May 2023 - September 2024

- Explored use of Explainable AI techniques in the Captum library for Pneumonia detection in Convolutional Neural Networks
 - Worked towards improving transparency in application of Machine Learning to medical classification, taking a step towards a more interpretable future
- Gained experience working with PyTorch to build and train ML models, along with extensive data collection and filtration
- Presented research to public at two poster symposiums, collecting feedback from other researchers and brainstorming next steps

Competitive Coding

2023 - Present

- Placed second out of 130+ teams (1.5%) in 2024 American Computer Science League (Intermediate Division), qualified to Finals with perfect individual scores
 - Learned and implemented data structures, computer number systems, and additional techniques to improve programming optimization
- Compete in various high school and collegiate hackathons, including USACO Bronze Division & Berkeley's CALICO

COMMUNITY OUTREACH

National Student Board Member Association, Policy Coordinator

September 2025 - Present

- Organize national programming among a network of **150+ student board members**
- Coordinate outreach to create more student positions on school boards
- Attend and present at national conferences to education leaders

California Student Board Member Association, Founder

April 2026 - Present

- Building state-wide network to improve collaboration and support among students
- Research and take positions on state legislation in education
- Provide resources and training to members

SURFBoardE, Chairperson & Student Board Member

January 2023 - Present

- Represent over **32,000+** students as sole student board member on Fremont Unified School District Board of Education
- Lead SURFBoardE, student group dedicated to serving as the liaison between board leadership and student population
 - Spearheaded educational reforms and event planning, including hosting annual District Representatives Conference & budget deficit discussion

- Organize resources, track attendance, and follow up with representatives to ensure smooth progression on initiatives

Curriculum & Instruction Committee, Chairperson October 2024 - May 2025

- District Committee focused on reviewing course curriculum adoptions and staff training
- Fostered discussions around new state-mandated Ethnic Studies course, and selection of diverse curriculum to aid teachers
- Engage with district staff at monthly meetings to review student feedback and work on developing a more supportive learning environment for all students

Technology Advisory Committee, Student Representative November 2023 - May 2024

- District Committee focused on reviewing current technology to advise district for implementation and guidelines
- Highlight student perspectives on technological use in education by speaking at monthly meetings and presenting ideas to committee members
- Successfully advocated for purchase of over **1,400 desktop computers** and **15,000 student chromebooks** to enhance learning and digital literacy

PULSE Discussion Group, Lead September 2023 - Present

- Foster productive conversations with students from across all departments at school site, working to develop healthy communication between students, staff, and administration
- Discuss feedback with administration and follow-up on initiatives
 - Students expressed stress associated with assessments. Feedback was presented to staff meetings, which resulted in increased test retake opportunities and additional individualized support for students.
- Leading expansion efforts to nine other secondary schools in FUSD to target site-specific issues

Speech & Debate, Debate Captain & Varsity Member August 2023 - Present

- Compete in Varsity Parliamentary debate, attending 30+ tournaments over three years
- Quarterfinalist at 2026 Nueva Invitational, 2025 UC Berkeley Cal Parli Invitational, and other major tournaments
- Teach novice & varsity-level debaters (team of 50+) at weekly meetings
- Prepare curriculum and lessons on research skills and debate structure

Boy Scouts of America, Life Scout & Senior Patrol Leader March 2020 - Present

- Lead one of the largest troops in council (60+ scouts), organizing outings to build teamwork and community service events
- 50+ hours dedicated to community service projects
- Facilitate troop communications to improve engagement and participation
- Planned and executed weekend campout to train future leaders with lessons and activities

Lincoln Law School San Jose Peer Court, Attorney & Youth Advocate February 2025 - Present

- Participate in hearings for youth offenders, helping to determine restorative plans as an alternative to punitive sentencing
- Work with other student advocates to promote accountability, empathy, and forgiveness

Youth Transforming Justice, Peer Solutions Volunteer July 2024 - Present

- Assist with restorative justice program designed to end youth-to-prison pipeline in NorCal
- Develop appropriate individualized plans and encourage community contribution over punitive measures

Fremont School of Coding, Co-Founder & Vice President January 2022 - September 2024

- Founded local non-profit aimed at providing free computer science education to students,

- prioritizing hands-on experience and engagement over traditional teaching methods
- Taught 125+ students over three years
- Held inaugural one-week international summer camp for students in India, teaching the foundations of programming and hosted various workshops to over 25 students
- Led social media presence and expansion to various schools in district

AWARDS

-
- | | |
|--|----------------------|
| • National Parliamentary Debate League Tournament of Champions Qualifier | <i>January 2026</i> |
| • Quarterfinalist at Nueva Invitational | <i>January 2026</i> |
| • Quarterfinalist at UC Berkeley Cal Invitational | <i>February 2025</i> |
| • American Computer Science League: 2nd Place (Intermediate Division) | <i>June 2024</i> |
| • First-Degree Martial Arts Black Belt | <i>December 2021</i> |
-

HOBBIES & INTERESTS

-
- *Staying Healthy.* Dedicated to maintaining both physical and mental health through hiking and exploring the outdoors. Currently a 1st degree black belt in taekwondo. Enjoy cooking and baking fun recipes, incorporating flavors from around the world.
 - *Exploring Literature.* Enjoy reading novels, researching foreign affairs, writing blogs, and reflecting through journaling.
 - *Listening to Music.* Explore musical genres from pop to hip-hop. Attend concerts, curate playlists for different moods, and explore emerging artists across platforms.
